

Overview

Revolutionizing the credit score with utmost ease and efficiency. To build long-term credit health and security for the users, Antino assisted SlayPay in developing diverse payment gateways for an effortless user experience.

SlayPay Provides Cutting-Edge 8-Point Security For A Frictionless User Experience.

Challenges

- Managing large transactions.
- Implementing backend security to pass VAPT.
- Integrated multi-payment gateways.
- Bank partners and NBFC integration.
- Modifying product as per RBI guidelines.

Technologies Used

- Node.js
- Flutter
- React.js

Solutions

- Leveraged the power of AWS and configured serverless event-driven architecture to handle large transactions seamlessly.
- Implemented primary security features to prevent cyber threats and cleared VAPT audit as per RBI norms successfully.
- Integrated multiple payment gateways and handled user's webhook for hassle-free transactions.
- Provided a distinct Set of implementations for smooth integration with bank partners and NBFC.
- Built new modules to pivot the product as per RBI guidelines and launch it in the shortest timeframe to plug & play successfully .
