

# Nord Anglia

## Overview

A futuristic approach towards revolutionizing the education sector- Nord Anglia combines world-class teaching and curricula with cutting-edge technology to create profound learning experiences. From the development stage to the designing phase, we're associated with Nord Anglia for now about 2.5+ years to assist them in offering personalized experiences for students, parents, and teachers online.

**Nord Anglia's App Act As A Multi-Module Platform To Give Seamless Online Experiences.**

## Challenges

- Multi-level notifications categorization - Students, Parents & Employees.
- Implementing digital signatures on report cards.
- Reporting incidents during premises.
- Developing single app catering to distinct user bases - Students, Parents & Employees.
- End-to-end chat solutions between parents & employees.

## Technologies Used

- Native Android
- Native iOS

## Solutions

- Enabled ESS and OHM Module to share real-time updates and notifications categorically to 3 different user bases - Students, Parents, & Employees.
- Integrated e-signature services in our custom code available only for parents and teachers to avoid false activities.
- Created SafeGuarding module which requires filling out the form to report the incident and inform the concerned authorities.
- Integrated 3 distinct user bases and did multiple rounds of testing to ensure single app compatibility.
- Introduced a chat module in the existing code for seamless end-to-end communication between Parents & Employees.
