

FITbasix Fitbasix

Overview

The future of fitness is here! Whether you want to lose, maintain, or gain weight, Fitbasix is the only pal you need. Hence, to help revolutionize their fitness journey, Antino helped Fitbasix in developing Web Admin Panel while also revamping their website and Android & iOS applications.

Fitbasix Delivers 1:1 LIVE Personal Training By Certified Fitness Coaches To Keep Your Fitness Goals On Track

Challenges

- Managing recurring payments like EMI's.
- Resolving the time gap between payment notifications.
- Generating customizable invoices.
- Preventing random allocation of trainers.

Technologies Used

- Flutter
- React.js
- Agora
- Apple WatchKit and Wear OS Integration
- Server AWS

Solutions

- Our developers created a custom function for all the necessary calculations and processes to handle recurring payments in the system.
- To resolve the time gap, our experienced developers removed the payment dependency on the webhook.
- Enriched the app with a PDF kit to generate invoices in a desired format that can be easily customized using HTML and CSS.
- Integrated the 'trainer assign' feature in the admin panel to ensure the allocation of appropriate trainers for the users.
