

Mitra

Overview

Mitra is a blue collar job platform that allows you the opportunity to work with some of the top companies in the country including Zomato, Amazon, Airtel, Shadowfax, Swiggy, Dunzo among others.

Challenges

- Custom UI for milestone.
- SSL Pining implemented from the client side as well as backend.
- App only works for real device (Detection of rooted device).

Technologies Used

- Android Native
- Kotlin
- Node.js, React with Redux, Angular.js
- Razorpay
- Figma for Design

Solutions

- Certificate and public key based SSL Pining.
- Used the Canva & Paint for designing a custom view.
- Allow backup false in app side and used rootbeer for detecting the rooted device.
