Godigit

Overview

Making insurance seamless for everyone- Go Digit Insurance offers simplified general insurance services and comprehensive protection against various incidents to all customers. From buying to registering claims, Antino paved the way for GoDigit users in making the insurance process easier and hassle-free with robust digital solutions.

"Virat Kohli, The Renowned Cricketer In India, Has Partnered With GoDigit As An Investor And Ambassador."

Technologies Used

• Java
• Camunda
• Angular
• React.js

Challenges

• Third-party API integration on multiple platforms.

• Modifying app timely as per IRA regulations.

• Implementing top-notch UI/UX design.

• Wide functionality for a distinct line of businesses.

• Authentication & Authorization to prevent malfeasance.

Solutions

• Enriched the app with new features using third-party API integration to make the same framework for diverse partners.

• Overcoming the challenge of frequently modifying the app and managing deployment twice a week as per IRA regulations.

• Ensuring UI/UX design beyond merely being visually attractive or informative to deliver a quality user experience.

• Modifying multiple insurance frameworks by integrating relevant features according to a different line of businesses.

• Built a well-armed fortress of authentication by integrating multiple features to prevent fraudulent activities.
