DealShare

Overview

DealShare, a revolutionary multi-category E-commerce platform for the seamless delivery of consumer products. It lets you buy online, grocery items like snacks, drinks, fruits, veggies and personal care products.

Technologies Used

- React Native
- QA
- React.js
- PHP, Java

Challenges

- Multiple pincode updation in the database.
- Grocery price integration with the warehouse database.
- Generation of SKU ID for individual warehouses.
- Compatibility of Referral Panel dashboard with the Admin Level.

Solutions

- Segregation of Pincodes into different categories for seamless updation in database.
- Linking of existing pricing patterns into particular warehouses.
- Integration of SKU ID with Offers.
- Generation of ORD Level with the Referral Panel in Admin Dashboard.
