Top Faculty

Overview

Top Faculty, a unique job recruiting platform, provides a one-of-a-kind experience to a diverse user base for finding new job opportunities and well-suited candidates. Therefore, to reach a wider audience digitally, Antino aided Top Faculty in developing a feature-rich website along with a robust Android and iOS mobile application from scratch.

Technologies Used

- React.js
- Nest

Challenges

- Prioritizing and reshuffling sponsored posts without any relevancy score.
- Multiple filtrations of data as per diverse user base.
- Granting access to use relevant profile functionalities as per multiple user bases- Employer, Individuals.
- Implementing a notification feature for sponsored posts.
- Creating a separate id for every unique tag

Solutions

- Enriched the platform with a unique algorithm that prioritized every sponsored post and reshuffled them to distinct users systematically
- Implemented a new algorithm to help users change their profile functionality and framework as per their user base- Employer, Individual
- Integrated the notification functionality in the code to enable real-time updates of the sponsored posts
- Refactored the data based on the inputs from the users to categorize every tag in a separate id
