Hippo Stores by Dalmia Group

Overview

India's one-stop destination offering the most extensive and comprehensive range of wholesale materials for construction under one platform. To revolutionize Hippo Stores journey on the iOS platform, Antino Labs assisted them in refurbishing their existing iOS application meticulously using the latest techniques.

"Hippo Stores, India's First Omni-Channel Platform Is Revolutionizing The Construction Sector Exponentially."
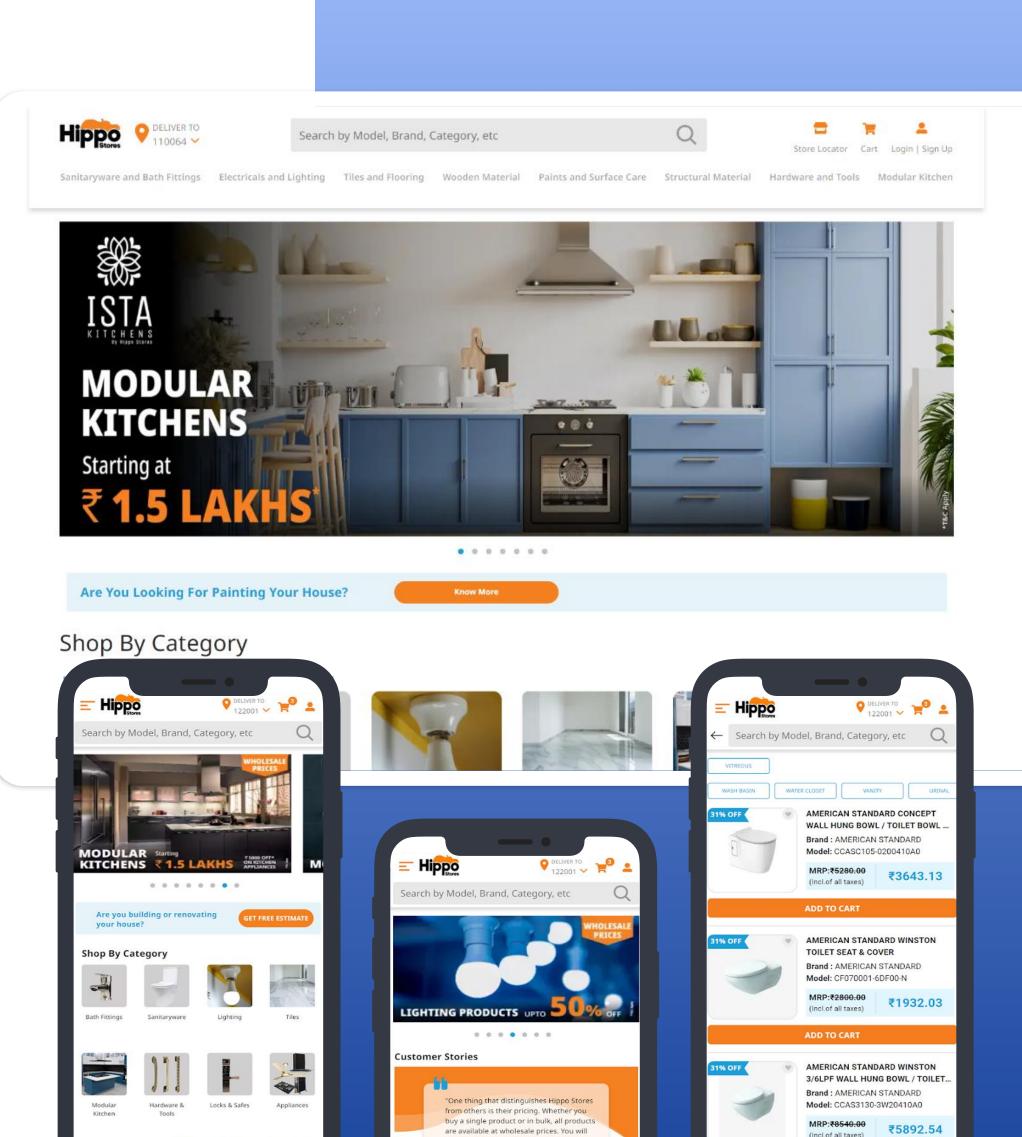

Challenges

· Optimizing and managing stress response of the app's performance.

· Improving the backend responsiveness of the app.

· Categorizing the app as per the products.

· Enabling dispatch notifications.

Technologies Used

· Swift

Solutions

· Operated on multiple screens and formatted API data to manage the stress response of the app's performance.

· From adjusting screen size to fine-tuning data, developers modified every element of the app to improve backend responsiveness.

· Refactored the data based on the field functionality to categorize the product systematically.

· Integrated the SMS functionality in the code to enable real-time notifications.
